For the past two decades, Decker's Landscaping has been serving the Capital Region with stellar customer service and designs that impress. Though the business has evolved over time, some elements have always remained the same. A passion for landscape design, a genuine love of nature, and an unwavering dedication to customer service remain at the forefront of Decker's. These core values have seen the business through two decades, and they are the cornerstone of their future success.

Founded by Alan Decker in 1990 as a design build company, Decker's quickly carved a niche for themselves in the industry while establishing a sterling reputation. With a vision for the future, Alan and his wife Jodi purchased a dilapidated greenhouse operation in Alan's hometown in 1993. After extensive work on the structure, the location opened up in April of 1993 as Decker's Landscaping & Nursery, Inc. Building on their already

established quality service, Decker's was now able to offer their customers quality plant material as well—it was a natural progression and a perfect fit.

As time went on, Alan's passion for nature lead Decker's to continue evolving into pond and waterfall installation. In 1997 Decker 's began installing water features, creating a slice of nature for each customer and adding an interactive element to their landscape designs. With water features including ponds, pondless waterfalls, bog filtration, wetlands, small decorative water features, rain barrels and rain water harvesting systems, Decker's has what you need to create a natural outdoor space. As a Certified Aquascape Contractor, Alan values knowledge and education and is certified in the latest water feature concepts. Decker's also continues to install full landscape design such as landscape plantings, retaining walls, walkways, patios, and outdoor fire pits to complete

and enhance any outdoor living space.

In 2003, to support their customer's needs, Decker's added a pond shop to their location, carrying everything needed for a successful and aesthetically pleasing pond. From pond kits for the do-it-yourselfer, liners and pumps, to underwater lights and a full line of pond accessories, they are a one-stop-shop for all of your pond needs. With the area's largest selection of aquatic plants, as well as a wide variety of fish—koi, comets, shubunkins, snails, and tadpoles—as well as fish products, Decker's is sure to meet your unique needs and exceed your expectations.

Alan and Jodi invite you to visit their shop and stroll their eight on-site display ponds—a great way to get some ideas for your own backyard oasis. Stop by and introduce yourself. The crew at Decker's will welcome you warmly and assist with whatever vision you may have!
